## Tell Gov. Cooper: Deny Pipeline Permits, Promote Solar+Storage

*There is still time to stop the Atlantic Coast Pipeline. Contact Governor Roy Cooper today ([contactgov@nc.gov](mailto:contactgov@nc.gov); 919-814-2000) and tell him to deny state permits for this fracked gas pipeline and support solar and batteries instead.*

The [Robesonian](#) newspaper interviewed NC WARN attorney John Runkle for its latest ACP update, which includes a list of permits still pending.

There is hope! The [N&O editorial page](#) came out against the pipeline in November. But ACP co-owner Dominion Resources seems intent on extending the pipeline into [South Carolina](#).

***Now is the time for a push to [tell Gov. Cooper](#) to deny this climate-destroying pipeline.***

While you're at it, tell Cooper there's a better way. Our [NC Clean Path 2025](#) report shows that solar combined with battery storage is the way of the future. In fact, a [large Australian battery installation by Tesla](#) just kicked in to cover two recent outages only weeks after being installed.

*Now in its 30<sup>th</sup> year, NC WARN's mission urgency is to induce Charlotte-based Duke Energy – one of the world's largest corporate utilities – to make a strong shift to clean, affordable energy in order to stem pollution's damage to communities, and to help avert climate tipping points and ongoing rate hikes.*
